Mr. John R. Bingham
Bingham Foods, Inc.
621 N. Prince Lane
Springfield, MO 65802

Re: Storm Water Discharge Permit.

Dear Mr. Bingham:

This office continually tries to keep the industry of the City of Springfield up to date on environmental concerns that may effect them. Recently we received a copy of the Draft General Storm Water Permit for industries covered by the SIC Code 20XX. This General Permit covers Food and Kindred Products. Please find the enclosed copy for your information.

Since Storm Water Permits are handled by the Missouri Department of Natural Resources, and not the City of Springfield, please contact Mr. Karl Fett if your have any questions. His telephone number is 1-314-526-2928.

If this office can be of assistance to you, please feel free to call at 864-1923.

Yours Truly,

Karen Chandler
Water Pollution Control Inspector
Surveillance and Enforcement.

cc: Mark Thornsberry, P.E., Director of Public Works.
Robert R. Schaefer, P.E., Supt. of Sanitary Services.
Randy Lyman, Sewer Surveillance & Billing Supervisor.

621 N. PRINCE LANE

APPLICABILITY

1. This permit authorizes the discharge of storm water runoff from food and kindred products operations to waters of the state of Missouri, including, but not limited to, establishments with a primary Standard Industrial Classification (SIC) code major group 20XX including manufacturers or processors of:

- meat products
- dairy products
- canned, frozen, and preserved fruits, vegetables, and food specialties
- grain mill products (including animal feed)
- bakery products
- sugar and confectionery products
- fats and oils
- beverages

2. This permit applies to facilities with significant activities and materials exposed to storm water. These materials and activities are: discharges from industrial plant yards; material handling sites; sites used for the application of any water which, during manufacturing or processing, comes into direct contact with or results from the production or use of any raw material, intermediate product, finished product, by-product or waste product; sites used for the storage and maintenance of material handling equipment; sites used for residual treatment, storage or disposal; shipping and receiving areas; manufacturing buildings; storage areas (including tank farms) for raw materials and intermediate and finished products; and areas where industrial activity has taken place in the past and significant materials remain and are exposed to storm water.

Only those facilities with these activities or materials exposed to storm water are required to obtain a permit.

3. If at any time the Missouri Department of Natural Resources determines that the quality of waters of the state may be better protected by requiring the owner/operator of the permitted site to apply for a site specific permit, the department may do so.
4. If at any time the permittee should desire to apply for an individual State Operating permit, the owner may do so.
5. This permit is not transferable to other owners or operators.
6. This permit only pertains to discharges of storm water.

EXEMPTIONS

1. Facilities that discharge storm water runoff directly to a combined sewer system are exempt from permit requirements.

621 N. PRINCE LN.

REQUIREMENTS

Note: These requirements do not supersede nor remove liability for compliance with county and other local ordinances.

1. The discharge of storm water from these facilities shall not cause a violation of the state water quality standards, 10 CSR 20-7.031, which states, in part, that no water contaminant, by itself or in combination with other substances, shall prevent the waters of the state from meeting the following conditions:
 - a. Waters shall be free from substances in sufficient amounts to cause the formation of putrescent, unsightly or harmful bottom deposits or prevent full maintenance of beneficial uses;
 - b. Waters shall be free from oil, scum and floating debris in sufficient amounts to be unsightly or prevent full maintenance of beneficial uses;
 - c. Waters shall be free from substances in sufficient amounts to cause unsightly color or turbidity, offensive odor or prevent full maintenance of beneficial uses;
 - d. Waters shall be free from substances or conditions in sufficient amounts to have a harmful effect on human, animal, or aquatic life.
2. All paint, solvents, petroleum products and petroleum waste products (except fuels), and storage containers (such as drums, cans, or cartons) shall be stored so that these materials are not exposed to storm water. Spill prevention, control, and/or management shall be provided sufficient to prevent any spills of these pollutants from entering a water of the state. Any containment system used to implement this requirement shall be constructed of materials compatible with the substances contained and shall also prevent the contamination of groundwater.
3. Collection facilities shall be provided on-site, and arrangement made for proper disposal of waste products, including but not limited to, petroleum waste products and solvents.
4. All fueling facilities present on the site shall adhere to applicable federal and state regulations concerning underground storage, above ground storage, and dispensers, including spill prevention, control and counter measures.
5. Substances regulated by federal law under the Resource Conservation and Recovery Act (RCRA) or the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA) that are transported, stored, or used for maintenance, cleaning or repair shall be managed according to the provisions of RCRA and CERCLA.

6. A storm water pollution prevention plan shall be developed within 180 days of receipt of this permit and implemented within 360 days of receipt of this permit. The plan will be developed in accordance with the EPA guidance manual "Storm Water Management for Industrial Activities" (EPA 832-R-92-006, 9/92). The permittee must submit the plan within 10 days of the receipt of a written request by the Department and the plan shall be available during site inspections.

SAMPLING REQUIREMENTS

Sample analysis or monitoring under this permit will be at the request of the Department only.

TERMINATION OF PERMIT

This permit may be terminated when activities covered by this permit have ceased and no significant materials are stored in such a way as to come into contact with storm water, or if a transfer of ownership of the facility and its activities has been made. If such a termination is sought, the permittee shall submit Form H, Termination of a General Permit.
